Our
Quality Films

Industrial and Packaging Films from

TRANSILWRAP COMPANY, INC.

**For more
than 65** *years,*

Transilwrap Company, Inc. has provided a complete line of plastic film, sheet and commercial plastics to the marketplace.

Our Films Group has been one of the fastest-growing areas of the company, recognized for our quality and in meeting customer needs.

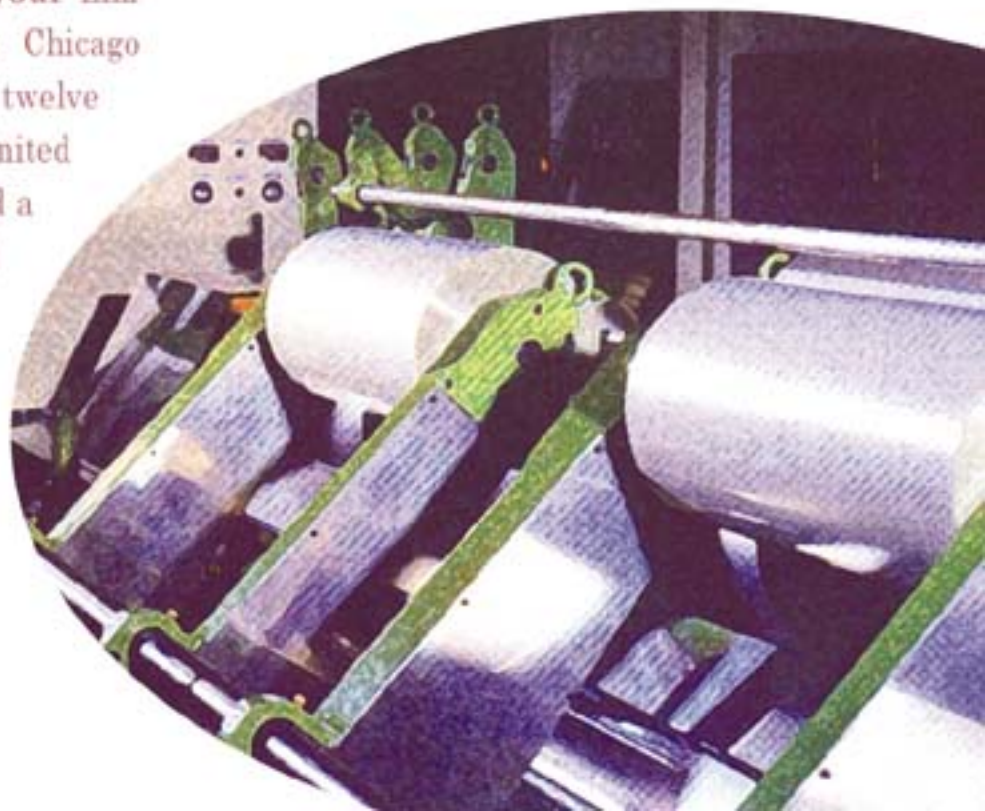

Fourteen Sites
in North America

Serving Markets
large and small

Quality Films
from around the globe

Transilwrap is equipped to respond to your film needs, with manufacturing plants in Chicago and Richmond, Indiana, as well as twelve distribution/conversion sites in the United States and Canada. A plant in Sydney and a soon-to-be-opened European facility will expand our ability to serve you globally. And, Transilwrap is known for its broad inventory of standard films...supplied to us by the best in the business.

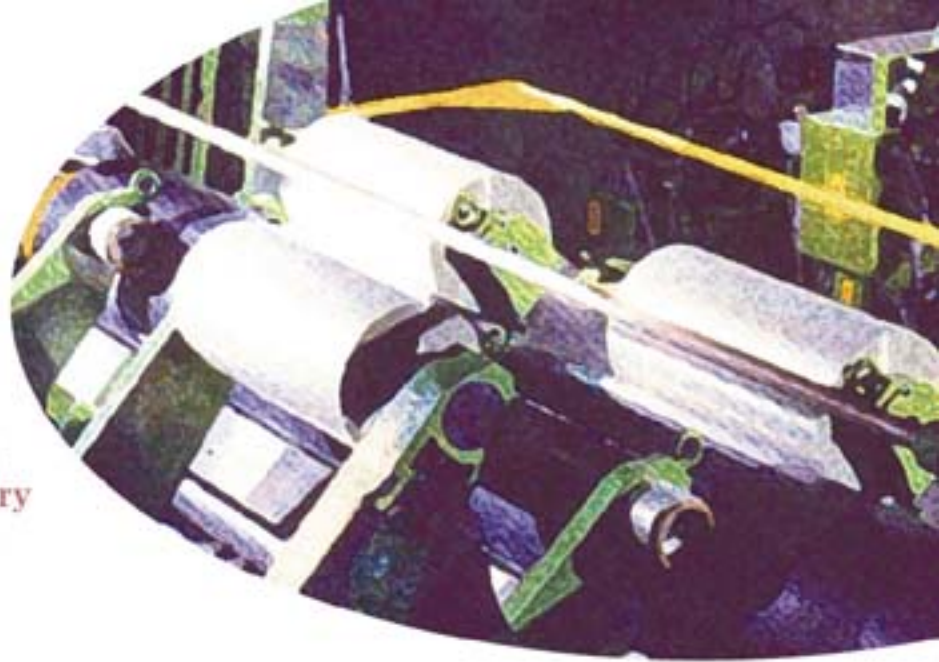

Founded in Chicago in 1931, Transilwrap was one of the first plastic film distributors in the United States. Today, it is one of the largest plastic film manufacturing and extrusion coating businesses in the world, providing plastic film solutions... whether you require manufacturing, converting or custom coating.

Our sales and support team has grown **with us**...and our customers can rely on their knowledge and expertise, in every case. In addition, we have a team of dedicated product managers and films salespeople who know how to recommend the best material for **your** application.

Our research and development team *knows* the chemical properties and base components of each material, and how it will respond to certain applications. This understanding is crucial in recommending the most workable material for our customers. And, this same team is continually examining our equipment and our methods to ensure that you are getting only the best, most cost-effective solutions for the challenges you face.
