Transilwrap Company, Inc. Adds New, State-of-the-Art Sheet Extrusion Line in Richmond, Ind. Facility

FRANKLIN PARK, Ill. – Transilwrap Company, Inc. announced it has installed a new, state-of-the-art sheet extrusion line, adding to its printable plastics and synthetics capabilities.

The new line furthers Transilwrap's capacity for its styrene, Transalloy (styrene alloy), synthetics and bio plastics products. It will also have coextrusion capability to offer new features to its sheet products.

The majority of the line will support the company's "Print On" Graphics division headquartered in Strongsville, Ohio. "We are ecstatic to add this new asset to support our growing print marketplaces, particularly with the expansion of the digital market," says Print GM Tim Carlin. "We expect to be ramping up our output later on this fall."

Transilwrap Company, Inc. is a manufacturer, coater and converter of plastics in the thermal laminating, printing, industrial, specialty packaging and graphic arts markets. Headquartered in Franklin Park, Ill., USA, Transilwrap has multiple distribution locations throughout the United States and Canada with three key business units: thermal laminating films, printable plastics, and industrial packaging and specialty films groups.
